

Cool

All the Way Around

Limits aren't cool. Don't get burned by inferior A/C coverage.

Refrigerant is one of the most critical components in an air conditioning system; without it, A/C systems can't create cold air. Many warranty providers put dollar limits on the amount they will pay for refrigerants like Freon®, which now has an average retail cost of over \$80 per pound!

Additionally, some warranty providers don't offer coverage for SEER matching, refrigerant recapture, haul away and disposal. All this can add up to hundreds of dollars in out-of-pocket expenses for your clients.

Here's what **limits** look like on a covered HVAC system repair*:

IN ADDITION TO REFRIGERANT YOUR CLIENT MAY PAY:

- Non-covered recapture, haul away and disposal costs
- Non-Covered SEER matching costs for full replacement

Don't Sweat It with 2-10 Home Buyers Warranty

SEER matching | No refrigerant limits | Refrigerant recapture protection | Haul-away and disposal

With **2-10 HBW**

Homeowner pays: → **\$0***
